

2016-02-26

Hi-Rez Studios,

Please use this letter as my strong recommendation for Will Brewer into your game programmer internship.

Will was an I.T. intern for Jordan & Skala Engineers during the summer of 2015. While he was here, he exemplified a plethora of interest in the networking, computing, and programming worlds. While primarily assisting the I.T. Team with workstation mirroring, and new user profile setups, he quickly demonstrated an understanding of the process that allowed him knock out one computer after another. Will shadowed much of my day-to-day activities and it was readily apparent that he was able to swiftly pick up on new concepts and previously unseen procedures.

During Will's occasional down-time from work obligations, he was often occupied with game programming. At the time he was building a Tetris game, from scratch, while focusing on the OOP aspects of the development. Will showed a superb knack for locating the sporadic bugs in the code, be they syntax or variable issues, and rectifying them without the need to test multiple code changes.

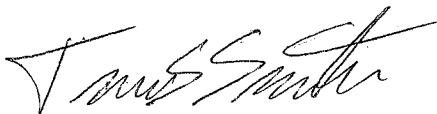

Will Brewer was a great asset to our I.T. Team during his internship, and I know that he, and your company, will benefit greatly from his participation in your game programmer internship.

A little about me (Travis Smith):

I have been working with computers since the late 80's, and I have a basic-to-intermediate level knowledge, of many programming languages, beginning with QBasic and Pascal, back in the day, and then moving on to C++, Visual Basic, and Java. Since 1996 I have been a professional network administrator and computer technician, who still has a habit of writing code when inspired, or the need to automate a tedious process strikes me (usually via DOS Batch and PowerShell). I definitely recognize the spark of creative programming in Will, and I hope that he has the opportunity to take it to great heights.

If you need any more information about Will Brewer, please feel free to call me at 937-368-8749 or email me at [tsmith@jordanskala.com](mailto:tsmith@jordanskala.com).

Sincerely,

Travis Smith  
I.T. Manager
